DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-31, drawn to connector, classified in class 403, subclass 2.
- II. Claims 32-33, drawn to process for using a connector, classified in class 29, subclass 428.

Inventions I and II are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case the product set forth in claims 1-31 could be used in a process other than the process for using a connector set forth in claims 32-33; for instance, a process of establishing a breakaway connection in a tow line including the step of connecting an end of a rope to a land vehicle (rather than underwater gear).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Species

This application contains claims directed to the following patentably distinct species of the claimed invention:

Species I – embodiment of the invention as shown in Figs.1-4, 5A, 6A, 8A, 10A, 10B, 16

Art Unit: 3679

Species II – embodiment of the invention as shown in Fig.5B, 6B

Species III – embodiment of the invention as shown in Fig.5C, 6C, 8B

Species IV – embodiment of the invention as shown in Fig.5D, 6D

Species V – embodiment of the invention as shown in Fig.7A, 7B

Species VI – embodiment of the invention as shown in Fig.9

Species VII – embodiment of the invention as shown in Fig.11

Species VIII – embodiment of the invention as shown in Fig.12

Species IX – embodiment of the invention as shown in Fig.13

Species X – embodiment of the invention as shown in Fig.14

Species XI – embodiment of the invention as shown in Fig.15

Species XII – embodiment of the invention as shown in Fig.17

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claims are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after

Art Unit: 3679

the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

A telephone call was made to Benjamin Hauptman on 11/1/2005 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
